

The Math Specialist ROLE

- *Highly qualified teacher working under the framework of RtII who is assigned a manageable roster of Tier 3 students in order to identify and close academic learning gaps.
- *Provides explicit and systematic instruction that incorporates scientific and research based best practices.
- *Reviews summative and formative data in order to differentiate instruction to meet student academic needs.
- *Uses effective instructional and classroom management techniques to provide a safe and motivational learning environment to booster student confidence and engagement.
- *Progress monitors on a regular consistent schedule to identify academic progress and needs and records careful notes on student progress.
- *Instructs in both small groups and 1:1.
- *Collaborates with peers and RtII/Instructional Coaches/Master or Lead Teachers on a regular basis to discuss student progress and needs.
- *Actively seeks out and enrolls in professional development opportunities to improve pedagogical strategies and knowledge. Takes advantage of opportunities to share that knowledge with peers.
- *Understands and implements all software and programs efficiently and effectively.
